HOME USE RULES.

All Books subject to Recall.

Books not used for instruction or research are returnable within 4 weeks.

Volumes of periodicals and of pamphlets are held in the library as much as possible. For special purposes they are given out for a limited time.

Borrowers should not use their library privileges for the benefit of other persons.

Books not needed during recess periods should be returned to the library, or arrangements made for their return during borrower's absence, if wanted.

Books needed by more than one person are held on the reserve list.

Books of special value and gift books, when the giver wishes it, are not allowed to circulate.

Readers are asked to report all cases of books marked or mutilated.

Do not deface books by marks and writing.

THE RADFORD IDEAL HOMES

TWELFTH EDITION

::

::

::

::

APRIL, 1919

IN PRESENTING this, the eleventh edition of THE RADFORD IDEAL HOMES to the public, the publishers wish to thank those who have shown so much appreciation for the first ten editions, and who have shown their appreciation not only by ordering the books, but by buying and favorably commenting on the blue prints and specifications. The encouragement we have received has been the means of urging us to print this tenth issue in larger quantity than heretofore. As the houses are moderate in price and convenient in arrangement, we feel sure of securing liberal patronage. In the planning of all our designs, we have recognized the fact that the people of to-day demand modern appearances, as well as the different conveniences, when they decide upon building a home. A great deal of time and study has been spent on each design, and every set of plans will be found complete and accurate in all details, no labor having been spared where any small advantage could be gained. Many people are surprised that we can furnish blue prints and specifications of such up-to-date houses at the price for which we advertise them, and we could not were it not for the fact that we have succeeded in supplying the demand for the very thing that the people have been looking for, namely, a moderate priced, convenient house. All of these plans have been made for us by a licensed architect of the State of Illinois. They are accurate and complete in every detail.

WHAT WE FURNISH IN BLUE PRINTS

Foundation and Cellar Plan

This sheet shows the shape and size of all walls, piers, footings, posts, etc., and of what materials they are constructed; shows the location of all windows, doors, chimneys, ash-pits, partitions and the like. The different wall sections are given, showing their construction, and measurements are given from all the different points.

Floor Plans

These plans show the shape and size of all rooms, halls and closets, the location and sizes of all doors and windows, the position of all plumbing fixtures, gas lights, registers, pantry work, etc. All measurements that are necessary are given.

Elevations

A front, right, left and rear elevations are furnished with all plans. These drawings are complete and accurate in every respect. They show the shape, size and location of all doors and windows, porches, cornices, towers, bays, and the like, and in fact give you an exact scale picture of the house as it should be at completion. Full wall sections are given, showing the construction from foundation to roof, the height of stories between joists, height of plates, pitch of roofs, etc.

Roof Plan

This plan is furnished where the roof construction is at all intricate. It shows the location of all hips, valleys, ridges, decks, etc. All the above drawings are made a quarter of an inch to the foot.

Details

All necessary details of the interior work, such as door and window casings, and trim, base, stools, picture moulding, doors, newelposts, balusters, rails, etc., accompany each set of plans; part is shown in full size, while some of the larger work, such as stair construction, is drawn to a scale of inch and a half to the foot.

Lumber Bill

We do not furnish a lumber bill. We state this here, as some people seem to think that a lumber bill should accompany each set of specifications. In the first place, our plans are gotten up very plain, and any carpenter who cannot in a few minutes take off the bill of lumber from these plans is not the man to build your house. Another reason why we send no lumber bill is that houses from these designs are being built in all parts of the country; from the Atlantic to the Pacific and from Hudson Bay to the Gulf of Mexico. Houses when finished may look the same, whether built in Florida or Canada, but the same material would not be used, for the reason that custom and the seasons will it differently.

Change of Plans

We cannot change our plans for the reason that every plan we have drawn is used as a negative, and the blue prints we sell you are photographed from that negative.

Estimated cost of our houses

It is impossible for any one to estimate the cost of a building and have the figures hold good in all sections of the country. We do not claim to be able to do it. The estimated cost of the houses we illustrate is based on the most favorable conditions in all respects, and does not include plumbing and heating. We do not know your local conditions, and, should we claim to know the exact cost of a building in your locality, a child would know that our statement was false. We advise consultation with your local responsible material dealers and reliable contractors, for they, and they alone, know your local conditions. We wish to be frank with you, and therefore make no statement that we cannot substantiate in every respect. If any plan in this book, or in any other book we publish, pleases you; if the arrangement of the rooms is satisfactory, and if the exterior is pleasing and attractive, then we make this claim—that it can be built as cheaply as if any other architect designed it, and we believe cheaper. We have studied economy in construction, and our knowledge of all the material that goes into the house qualifies us to give you the best for your money. We give you a plan that pleases you, one that is attractive, and one where every foot of space is utilized at the least possible cost. Can any architect do more, even at seven to ten times the price we charge you for plans?

Blue-printed working plans and
typewritten specifications

The house plans illustrated in The Radford American Homes, The Radford Ideal Homes, Modern Carpentry, Steel Square volume 1, Steel Square volume 2, and Common Sense Stair Building, have for their foundation the best equipped architectural establishment ever maintained for the purpose of furnishing the carpenter, contractor and home builder with complete working blue-printed plans and typewritten specifications at an average price of only \$5.00 per set. All elevations and floor plans are drawn to a scale of one-quarter inch to the foot. **The regular price charged by others is from \$40.00 to \$75.00 for the same work.** Without this complete and exceptionally well-equipped establishment always at your service, these illustrations of plans would be useless to you. The working plans of any house illustrated by us are held in readiness for you. You do not have to wait a day for them to be prepared.

Blue-printed plans

On this page we illustrate an exact photographic reproduction of a set of our blue-prints, bound in cloth and waterproof paper ready for use. We use only the finest heavy blue-print paper. We take every precaution to have each line perfect and distinct. We furnish the front, two side and rear elevations, cellar, foundation and all floor plans, besides all the necessary interior details. These plans are all drawn to a scale of one-quarter inch to the foot.

Of what they consist

We use the best quality Gallia blue-print paper, No. 1000X. We furnish for a set of plans the front elevation, right elevation, left elevation, rear elevation, all floor plans, cellar and foundation plans, and all necessary details. Our specifications consist of from fourteen to twenty pages of typewritten matter, giving full directions for carrying out the work.

Both the plans and specifications are bound in heavy water-proof material and in an artistic and substantial manner

Our guarantee

If upon receipt of our plans you do not find them as accurate, complete and well drawn as any you have ever used or seen, or if you do not consider them good value, **we will refund your money.**

SPECIAL PLANS AFTER YOUR OWN SKETCHES

AT POPULAR PRICES

If you prefer to have a home constructed after your own ideas of arrangement, we would like very much to help you in developing your plans, or assist you in any way to solve the problem of a plan for your new home.

There are scores of people who spend years in planning and designing the home they wish to build, and, in many cases, never cease regretting that it does not come up to their requirements. "Home made" plans are inaccurate and cause endless worry, waste of materials and extra expense. With our long experience and with the equipment and the facilities we have for handling work of this kind, we can relieve you of the trouble and anxiety of planning your own home, save you time and money and furnish you with plans that we know will be entirely satisfactory. All we ask is an opportunity to demonstrate our ability to please you.

CORNER OF DRAFTING ROOM.

Our work is by no means confined to the designing and planning of houses, for, in addition to this class of work, we make a specialty of such work as:

Schoolhouses, Office Buildings, Bank Buildings, Factories, Town and Lodge Halls, Churches, Hotels, Public Libraries, Stores, Farm and Outbuildings and All Kinds of Public Buildings.

Our Special Department is the finest of its kind in the country, being under the personal supervision of Licensed Architects, who have experience in handling all kinds of work, and they have the assistance of a corps of competent draftsmen.

Our location, equipment, and facilities for handling work of all kinds cannot be excelled. Every plan we design or develop is guaranteed to be complete and accurate in every respect. We can get plans out in the quickest time possible and at a price that cannot help but interest you.

Our experience being of such long duration and our work extending over such a large territory, enables us to give you the most satisfactory results in every instance.

Our aim is to please you. Our whole organization is at your service. Consult us before purchasing your plan. We can save you money.

The Most Wonderful Books Ever Published

A Complete Encyclopedia on the Practical Uses of the Steel Square

designs, handsomely stamped. Printed on the best quality of paper. Each volume contains 50 house plans. If not satisfactory in every way they can be returned after examination and your money will be refunded.

The Department of Questions and Answers

sent the editors by practical carpenters all over the country, have been fully answered. They are questions which come up in your work every day, and the solutions of these practical problems here given will prove a valuable aid to you. Price, per volume, postage prepaid..... \$1.00

Just Published This very valuable and practical work is published for the first time. It is up to the minute, being issued January 1, 1907. This splendid edition is a brand new book from cover to cover, written in simple, plain, every-day language so that it can be easily understood and followed. Information of value that has appeared in former works appears in this work, together with a vast amount of new, practical, every-day information, such as is necessary for every progressive and successful carpenter to know.

This Up-to-Date and Practical Work on the application of the steel square, treats of the laying of the rafters, finding the lengths of jacks, securing levels, laying out hopper bevels, treating of the steel square as a calculating machine, and showing how to measure solids, surfaces and distances.

Special Chapters are devoted to that part of stair building to which the steel square can be applied. Other chapters treat of the adjustable fence, roof framing, hipped roof framing, hoppers and hopper bevels, combination squares, key to the steel square, possibilities of the steel square, polygons and miters, pitches and roof framing, and miscellaneous rules and examples.

Practical and Instructive Illustrations to the number of more than 300 are scattered through this work. These illustrations are not technical mathematical designs, nor geometrical problems, but are the thoroughly practical illustrations of a thoroughly practical text, bringing to the attention of the carpenter such points of interest and information as he needs in his every-day business. While the text and descriptive matter are so accurate and easy of comprehension that they could be understood without even the assistance of the illustrations, nevertheless the book has been thoroughly and profusely illustrated with diagrams and drawings.

Remember this work is absolutely up to date (being issued January 1, 1907). Each volume measures 6x9 inches, and contains over 300 pages, being the largest books on the steel square ever published. They are bound in cloth with attractive cover designs.

in Volume II is one of the most useful, interesting and instructive parts of this work. In this part numerous questions, which have been sent the editors by practical carpenters all over the country, have been fully answered. They are questions which come up in your work every day, and the solutions of these practical problems here given will prove a valuable aid to you.

The Most Practical Books Ever Published

A Complete Up-to-Date Explanation of Modern Carpentry

New Special Edition This work, "Practical Carpentry," is absolutely new, being completed only January 1, 1907. It is written in simple, plain, every-day language so that it can be easily understood.

It is the Most Complete most accurate, most up to date and most practical work upon this subject. It contains the best and quickest methods for laying roofs, rafters, stairs, floors, hopper bevels, mitring, coping, splayed work, circular work, and, in fact, for forming all kinds of joinery and carpenter work.

Special Chapters are Devoted to Building construction, which takes the carpenter from foundation to roof, with complete illustrations of each detail, such as foundation, windows, cornices, doors, roofs, porch work, etc. There are also special chapters devoted to good and faulty construction and all kinds of framing, geometry, arches, centers, window and door heads, steel square in carpentry, house framing, roofs and roof construction, building construction, covering of roofs, mouldings, joints, straps and other fastenings, stair building and questions and answers on all subjects pertaining to the building industry.

400 Special Illustrations There are over 400 illustrations; many of them cover an entire page, and they illustrate completely and instructively the text. They show the detail and actual construction down to the minutest point. They enable the reader to understand the text easily and to follow the work in hand without difficulty.

Remember this work is the latest one published on this extensive subject (issued January 1, 1907). Each volume measures 6x9 inches, and is bound in cloth with cover design attractively stamped. Contains more than 300 pages in each volume. Printed on an excellent quality of paper. Each volume contains 50 modern house plans. If not satisfactory in every way they can be returned after examination and your money will be refunded.

We are fortunate in being able to present a number of full-page details, showing the construction of cornices, porches, stairs, etc., which were prepared for this work by G. W. Ashby. They show the construction of each part completely, and complete dimensions are given in all cases.

Radford's Artistic Bungalows

ILLUSTRATING THE BEST IDEAS IN BUNGALOW ARCHITECTURE
JUST OFF THE PRESS

SEE THIS BOOK BEFORE BUILDING YOUR BUNGALOW

It is on account of the great attractiveness of the Bungalow and the great demand for buildings of that construction by home builders that this volume is offered to the public. In its preparation a vast amount of deep study of the subject and tireless energy have been given by the most eminent architects of the country, so that in this volume is condensed the best thought on Bungalow construction that it is possible to secure. The home builder will find here every style of Bungalow that has proved itself worthy of being classed with that form of construction, so that any taste may be suited.

This handsomely bound book, size 8x11 inches, contains the perspective views and floor plans of 208 Bungalows suitable for any climate and for every material. The illustrations show the Bungalows exactly as they will appear when built and the floor plans show the size and arrangement of the rooms. Estimated cost of construction ranging from \$500.00 to \$5,000.00 in price.

This book is printed on the best enameled paper from the finest half tones and zinc etchings (more than 600 half tone cuts and zinc etchings being used to properly illustrate it.)

NEW COMBINED HOUSE AND BARN PLAN BOOK

At A Cost of Many Thousands of Dollars and years of experience of hundreds of the most practical building experts, we have just completed the only COMBINED HOUSE AND BARN PLAN BOOK in existence. It contains about 300 pages, size 8x11 inches, and is handsomely bound in Red Art Boards, making an attractive and durable binding.

Two Massive Books Bound In One and illustrated with over Twelve Hundred Copper Half Tone Plates and Zinc Etchings which were drawn especially for this work. It contains over 300 Houses, Barn and Farm Buildings, designed and drawn by the best architects and selected for their popularity with the Building Classes.

The Houses Illustrated were selected for their excellence, practical design and economical arrangement. Perspective Views and Floor Plans being shown complete, together with estimates of cost.

The Farm Buildings in this book are illustrated by large drawings of floors, sides, ends and frame work, together with perspective views sufficient to guide the contractor or builder in the construction of any of the buildings described.

Any Person Contemplating Building a house, barn or other contemplating making any improvements on their farm, should secure a copy of this massive work, which will be so valuable in helping them to select a design which will be at once practical from every point of view and at the same time economical.

This New and Up-to-Date Book has just been compiled by The Radford Architectural Company, which is the logical place to look for plans and information on the building of popular priced houses, barns and farm buildings. The Radford Architectural Company is the largest of its kind in the world. They design and sell more complete plans and specifications for all kinds of buildings and they are the largest publishers of Building and Reference Books in the world.

The New Combined House and Barn Plan Book, postage paid.....\$1.00

New \$5,000 Book of Barn Plans

The combined thought and work of the best minds in the country in regard to farm buildings. It cost several thousand dollars to compile the book, besides the cost of printing and publishing it. It contains what might be termed a veritable storehouse of practical barn lore not to be found within the covers of any other book, or obtainable in any other way.

The Illustrations in the book are large drawings of floors, sides, ends and frame work, together with perspective views, sufficient to guide any carpenter or builder in the construction of same. It is a book which should be in every farm home, if you only intend to repair a little, or just build a small chicken coop. It is a good thing to even sit down and read, as the knowledge so gained will be highly valuable in hundreds of other ways.

Great Many of the barn plans in this book have been contributed by farmers themselves from all over the United States and Canada, and are therefore the product of practical experience from farmers who have learned by actual necessities the barn that was most practical and best suited to their needs. They are not fancy barns and buildings, but practical barns such as every farmer likes. They contain a great many little advantages that are not usually found in ordinary barns.

Each and Every Plan in the book is accompanied by a lengthy written description explaining and giving the details of the drawings, and so worded and arranged, numbered and indexed, that it must be readily understood by anyone who reads it. Your money back if you are dissatisfied.

Our New \$5,000 Book of Practical Barn Plans shows just what every farmer needs. It contains drawings, pictures, plans, specifications and everything necessary and up-to-date for a barn, stock shed, wagon shed, corn crib, poultry house, hog house, horse barn, smoke house, ice house, silo, dairy barn or any other conceivable out-building on the farm. Not only one plan of each, but many of each are shown with all the latest inventions and contrivances for saving time, money and labor.

This Book Was Compiled by Mr. Wm. A. Radford, President of "The Radford Architectural Co.," Author of "The Steel Square and Its Uses," and "Practical Carpentry," and the best authority in the country on all matters pertaining to the building industry.

CEMENT HOUSES and HOW TO BUILD THEM

The best, largest and most popular book of its kind ever published.

Complete Information for the
Buyer, User and Prospective Homebuilder.

176 pages, size 8 x 11. Over 200 illustrations, with Perspective Views and Floor Plans of

87 — Eighty - Seven Cement Plaster and Concrete Block Houses — 87

All types and designs of houses are shown, ranging in price from \$750 to \$4,000. Plans were all drawn by licensed architects and are guaranteed to be absolutely correct in every detail.

This Large Book Contains

Illustrated Details of Cement Construction,
Standard Specifications for Cement,
Standard Specifications for Concrete Blocks,
Valuable Information Concerning
Waterproofing, Coloring, Aggregates,
Proportioning, Mixing, Paving,
Reinforcing and Monolithic Work,
Foundations, Walls, Partitions,
Steps, Stairs, Floors, Sidewalks,
Sewer Pipe, Tile, Cement Shingles,
Chimneys, Porches, Tanks and Cisterns,
Expanded Metal Meshing, Metal Lath,
Establishing a Concrete Block Business,
Cement Plaster and Stucco Work,
Concrete on the Farm, Cement Brick,
How to Overcome Concrete Troubles,
Causes of Cement Failures, Freezing,
How to Select Proper Aggregates,
Applying Stucco to Old Walls,
Examples of Strength, Tension and Compression,
Placing Reinforcing Rods, Adhesion,
Dimensions for Beams, Vibrations,
Miscellaneous Information of Every Kind.

Perspective Views and Floor Plans of

Concrete Block and Cement Plaster Houses
Finest Ever Designed.

All houses illustrated with fine half-tone cuts, printed on enameled paper. The illustrations show the houses exactly as they will look when built and give a very clear idea of their appearance. All the floor plans are shown, giving the location and dimensions of all rooms, closets, porches, etc., with detailed sections and elevations. The houses illustrated range from the small to the medium and will appeal to the average man or woman who intends to build a home.

Stores and Flat

Buildings

**The Most Popular
Plan Book of the Day**

**The Latest Ideas In Two—Four—Six and
Nine Flat Buildings, Stores and Lodge
Halls, Bank Buildings and
Double Houses.**

EVERYTHING BRAND NEW

A Brand New Book—Just Off The Press—Absolutely the first and only book of its kind ever published illustrating over fifty popular designs in low priced flats, store buildings, bank buildings and double houses in different constructions; cement plaster, concrete block, brick, stone and frame. Included in this collection are a large number of stores and bank buildings suitable for the small town or village as well as the large city. No more valuable book could possibly be imagined for the use of anyone contemplating building.

Every building illustrated was designed by a licensed architect standing at the head of his profession who has made a study of economy in construction and our knowledge of the material that goes into the building qualifies us to give you the best for your money. Printed on the finest grade of enamel paper from the very best half tones and zinc etchings, showing the perspective view and floor plans of each and every design, thus giving a picture of the completed building and detailed drawings of the interior arrangement. An approximate estimate of the cost of the building, based on favorable conditions, is given under each design of the building. Every plan guaranteed to be complete and accurate in every detail.

CYCLOPEDIA OF CEMENT CONSTRUCTION

FIVE MASSIVE VOLUMES

Two thousand pages—nineteen hundred illustrations, diagrams, charts, plans and working drawings to demonstrate BY PICTURE every example given in the text—supplemented by over three hundred full page half-tone plates of unusual interest; handsomely and durably bound in three-quarter red morocco, full Persian library covers, marble tops.

ABSOLUTELY BRAND NEW

At the cost of thousands of dollars and years of experience of hundreds of the best known practical cement experts, architects, construction and civil engineers, we have collected and prepared the only Cyclopaedia of Cement Construction in existence. There is not one line of useless information in the entire set. From cover to cover of each and every volume the work teems with the most vital kind of instruction to the concrete worker. It covers everything thoroughly, completely and authoritatively, from the history of cement through the various ages clear down to its latest application; from the laying of a cement sidewalk to the building of huge municipal water systems of reinforced concrete, costing millions of dollars.

A \$100,000 SET OF BOOKS

Not a collection of pretty pictures or fascinating tales of fiction, but five great big volumes, full of the soundest kind of instruction on the liveliest subject in the world today—the uses and the applications of concrete to modern building construction. One hundred thousand dollars is a big sum of money, but it really does not cover the actual expense to us to prepare this set of books. When you consider that the biggest authorities on the use of concrete, only the most expert engineers, have been asked to contribute to this great work, you will readily understand the gigantic nature of the task and will have a slight idea of the immensity of the cost. Then take into consideration the handsome appearance of the volumes, the durable attractive binding, and their great size and scope. If it was not for the fact that we expect to sell many thousand sets we could not afford to make any such offer as this.

Special Introductory Sale

YOURS FOR
ONLY
\$1.00

Because this set of books has cost such an enormous amount of money to prepare, it is an absolute necessity for us to sell a great many thousand sets to get back even the actual cost to us. That is why we must advertise these books in the most effective way at the start. We do not believe we can advertise this set of books in any better way than to place a number of sets in the hands of representative men in the concrete and cement industry. That is why we have set aside the first edition of one thousand sets to sell, if necessary, even at a loss for the sake of the advertising it will give future editions.

YOURS FOR
ONLY
\$1.00

1,000 Sets at 33 Cents on the Dollar

INCLUDING

a full year's subscription to the

Cement World

The biggest and best cement paper published in the interest of the cement industry. It is a constant source of information to the practical man and the student. It is profusely illustrated, handsomely printed and in every way a high class standard publication.

\$12.80 INSTEAD OF \$38.00

Free on Five Days' Approval—No Risk to You—No Obligation—No Expense

We are assuming a great risk in making an offer of this sort. You realize that. But we do this for one reason only. We know if you order this set of books at this low price and on these liberal terms you will be so entirely satisfied that you will not hesitate to recommend the set to any friend, and we feel sure you will always have a good word to say about the Cyclopaedia whenever it is mentioned.

This set of books is built from the ground up. It is for the practical man. It tells the "how" and "why" of everything pertaining to concrete construction without difficult mathematics. There is not a line of text, an illustration, a drawing in the entire set which the average school boy cannot completely and thoroughly understand without going anywhere or to anybody for further explanation. Read over the terms again. You lose nothing whether you buy or not, but by ordering now you get this great big work, which appeals so particularly to you and your means of earning a living, absolutely without risking a cent. Then if you finally decide to buy it, you save yourself \$25.20 on the purchase price, and not only that, but you get the free premium and also a full year's subscription to the Cement World, the greatest cement paper published.

Why delay; why hesitate, when we take all the risk? Read the "No Risk" coupon carefully, sign it and send it in before you lose the circular.

FREE PREMIUM

As a special inducement for quick action on your part we will give you during the term of this special offer, ABSOLUTELY FREE, a handsome quarter-sawed oak Book Case, especially made to hold this library. This means added expense to us, but we are willing to pay the cost of quick action on your part.

This Book Case Offer is made solely to have you act on the offer at once.

FREE ON APPROVAL

Our plan of sale binds you to nothing. We give you the really great opportunity of securing these books for **five days' free examination** in the privacy of your own home or office, no one to bother you while you look them over, no one trying to influence your judgment. You examine the books **at our expense**, and if you don't want to keep them permanently you merely notify us by postal card and we remove them immediately.

RADFORD ARCHITECTURAL COMPANY, 11th & 12th Floors, Medinah Bldg., CHICAGO, ILL.

"FRAMING"

A BIG, PRACTICAL, UP-TO-THE-MINUTE BOOK FOR THE ARCHITECT, DRAFTSMAN, CONSTRUCTION MAN, CONTRACTOR, BUILDER AND CARPENTER

THIS book contains the boiled-down essence of all the accurate information on the subject of "Framing" possible to obtain; indispensable to the man who in any way has anything to do with construction.

Wm. A. Radford, editor-in-chief of the American Carpenter and Builder; editor-in-chief of the Cement World, author of "Practical Carpentry," "Steel Square and Its Uses," "Cement Houses and How to Build Them," and other well-known and popular building books, is the author of "FRAMING." This is Mr. Radford's latest book, and it is the largest, the most complete and the most instructive building book ever written by him. It deals with the subject of "Framing" in its multitude of forms and designs in a most thorough manner. Nothing is omitted that will help and guide on the construction of houses, barns, roofs, etc., while particular care has been taken to exclude any and every method of framing that has not been given a thorough and convincing test by experienced builders.

Practical Features of This Great New Book

"FRAMING" will be the largest book of its kind ever published. It consists of 356 pages, size 6 x 9 inches,

and printed from large, clear type on a high-grade book paper. More than 100 pages of illustrated details will be a feature that will make it most valuable.

This large new book, "FRAMING," is written so that any reader can understand every page, every term used and every detail shown. It is entirely free from technicalities, and yet its pages are meaty with instructions to all classes of builders, from the youngest apprentice to the journeyman, as well as the practical builder and the largest contractor.

Practical information is the keynote of "FRAMING." By practical, we mean information that can be successfully applied to the everyday work of the average carpenter, builder and contractor, as well as the more intricate forms of framing that come less often, but about which it is necessary to be fully posted. The book presents problems as they have been worked out by well-known architects and the man on the job.

"FRAMING" is illustrated with over 100 pages of detail drawings, diagrams, detail plates, etc., including many pages of full-page plates never before published, reproducing architects' original drawings, and also details of buildings in all stages of construction.

The many parts into which "FRAMING" is divided makes it especially valuable, for the reason that each particular form of framing is given separate and distinct treatment, and anyone in search of immediate information on any given subject will not have to search through page after page, but will find the desired information under its own section and chapter heading.

"FRAMING" is the largest book on this comprehensive subject that has ever been published. No book attempting to treat this important part of construction has ever before so successfully covered the ground. Every phase, part and detail of framing a house, a roof, a barn or other structure is given and treated fully and exhaustively, with complete details showing each successive step to be taken.

"FRAMING" is practical in that it shows the easiest and most common-sense way to do the work. It does not confine its descriptions to one person's ways or views, but shows many examples of each kind of framing, all of which have been fully tested by experienced workmen and can be relied upon to be absolutely correct.

READ PARTIAL TABLE OF CONTENTS ON NEXT PAGE

"FRAMING"

Largest And Best Book Of Its Kind Ever Published

PARTIAL TABLE OF CONTENTS

FRAMING—General Synopsis

Part I. Framing for all Types of Houses

Chapter 1. Ordinary Frame Houses—Framing complete from foundation to roof
Chapter 2. Roof Framing Simplified
Chapter 3. Stair Building Simplified
Chapter 4. Cement Plastered and English Half-Timbered Houses
Chapter 5. Wood Framing for brick veneer houses
Chapter 6. Wood Framing for stone and brick houses

Part II. Barn Framing Complete

Chapter 1. Heavy Timber Barns
Chapter 2. Plank Framing
Chapter 3. Balloon or Self-Supporting Construction

Part III. Framing of Factories, Stores and Public Buildings

Chapter 1. Mill Construction
Chapter 2. Wood Trusses of all kinds
Chapter 3. Architectural Framing as in churches, gymnasiums, halls, etc.

Part IV. Miscellaneous Framing

Chapter 1. Scaffolding and Shoring
Chapter 2. Wooden Bridges
Chapter 3. False Work for Concrete

Part V. Useful Tables and Data

Part VI. Dictionary of Terms and Index

FRAMING—Contents

Part I. Framing for all Types of Houses

Chapter 1. Ordinary Frame Houses—Framing complete from foundation to roof
Preparation for Building—Arrangement of Materials—Building Lines—How to lay them out—Principles of Framing
Foundation Work—Posts and piling—Forms for concrete—Basement windows—Bedding of sills on masonry
Sill construction—Good and faulty sills—Cheap sills—All approved types of sill construction
First Floor Joists—Laying out, cutting and setting—Sizes and spacing for common spans—Bridging and bracing—Beams and supports
Studding—Laying out and cutting, spacing—Erecting—Bracing—How to make a good corner
Second Floor Joist—End-framing—Sizes and spacing
Partitions—Braced or self-supporting construction—Double partitions for sliding doors—Party walls—Sound-proof partitions—Plaster partitions
Cornice construction—Good and faulty construction—Box cornice—Open cornice—Other approved types of cornice construction
Window Framing—How to frame for and place an ordinary window—Standard sizes—Special windows—Bays—Oriels—Casements—Dormer window construction—

hang
outside
Fold-

Flooring—Rough—Finished—Sound proof.
Pore Framing—Foundation—Flooring—Circular porches—Steps—Balustrade and finish—Porch roof
Miscellaneous Supports and Interior Framing—Attic tanks—Chimney brackets—Fireplaces
Furring—Lathing—Plasterboard—Application of Interior trim

Chapter 2. Roof-Framing Simplified

What the roof is and how constructed—Terms defined
Types of Roofs in General Use—Simple gable roof—Lean-to roof—Gambrel roof—Hipped ridged roof—Hip and valley roof
Roof and Rafter Framing with the Steel Square—Ordinary Typical roofs of all styles figured out in detail for steel square framing—How to lay out the rafters—Common—Hip and valley—Cripple—Jack—Best method of procedure
Short Cuts and Kinks in Roof and Rafter Framing
Ridge Pole Construction—Purlins—Wind bracing

Chapter 3. Stair Building Simplified

Approved Types of Stairs in Use in Houses—How to lay out a Flight of Stairs—Headroom—Proper proportion treads to risers—Landings—Stringers
Framing Construction Adjacent to Stairway
Approved Stairway Construction
Use of Steel Square in Stair Building
Hand Rail and Baluster—How to lay out and erect

Chapter 4. Cement Plastered and English Half-Timbered Houses

Popularity—Desirable features—Relative cost—Durability
Wall Construction—Timber framing, how different from ordinary frame construction—Furring—Metal lath—Wood lath—Method of procedure
Cement surfacing—Proper proportions of material to use—How prepared—How applied—"Scratch" coat—"Browning" coat—Finishing coat—Artistic finishes—Tinting Houses with English Half-Timber Effect—Modern construction—How different from oldtime English method
Other Types of Combined Frame and Concrete Construction

Chapter 5. Wood Framing for Brick Veneer Houses

General Remarks—Relative cost—Water-proofing—Desirability
Wall Construction—Timber framing—How different from all frame houses
Bonding of Masonry to Wood Framing
Miscellaneous Special Problems—Window opening—Door openings—Cornice construction—Second story finish
Use of Cement Blocks for Veneer Construction
Rules for Figuring Brick, Mason Work, Mortar, Cement Blocks, etc.

Chapter 6. Timber Framing Entering into the Construction of Stone and Brick Houses

Bedding of Joists
Window and Door Framing
How to Fasten Wood to Masonry
Furring
Application of Interior Trim
Roof Framing for Extra Heavy Roofing, as slate, tile, etc.
Special Problems Connected with House Framing

Part II. Barn Framing

Chapter 1. Heavy Timber Barns

General Principles—Location—Drainage—Foundations, etc.
Typical Details giving proper sizes of all members, proper spacing, etc.
Joists Used in Heavy Framing
Wind Bracing, Snow load, etc.—How to determine—Roof Construction and Support

Chapter 2. Plank Framing for Barns

Relative Cost and Desirability
Typical Details showing construction and sizes of all members
Proper Construction for the different ordinary sizes of barns
Bracing

Chapter 3. Balloon or Self-Supporting Construction

General Principles
Bracing
Roof Construction
Support of Hay Track, etc.
Special Features Connected with Barn Framing—Construction and hanging of doors—Water tight barn floor—Cement flooring, mangers, etc.

Part III. Framing of Factories, Stores and Public Buildings

Chapter 1. Mill Construction

Relative Fireproof Character—Desirability—Cost
Details of all important parts showing recommended practice
Saw Tooth Roof Construction
Support of Machinery, Shafting, etc.

Chapter 2. Wood Trusses of all Kinds

Principles of Truss Construction—Strength of timbers
Typical Trusses of all kinds detailed

Chapter 3. Architectural Framing, as in Churches, gymnasiums, halls, etc.

General Principles—Beauty—Strength, etc.
Typical Designs—Detailed
Proper Finish, etc.

Part IV. Miscellaneous Framing

Chapter 1. Scaffolding

Bracket, Pole, Painters', Masonry Shoring

Chapter 2. Wooden Bridges

Small Road Bridges
Trestle Work, etc.

Chapter 3. False Work in Concrete Construction

General Principles
Walls
Arch Supports

Part V. Useful Tables and Data

Part VI. Dictionary of Terms and Index

All terms used in framing, building construction and architecture defined and explained, with cross reference to full discussion in body of book

¶ The up-to-date mechanic in every kind of work trains his **brain** even more carefully than he ever trained his hand. That is the slogan of Twentieth Century Success—the **trained mind in a trained body**.

¶ The man who uses the compass, the steel square, the chisel or the saw has got to have a true eye and steady hand. He learns in his apprenticeship how so train his eye and hand to the top notch of efficiency. Too often, however, this same man of the **trained body** forgets to **train the mind** that **directs** the work of the body. This kind of a man with the **untrained mind**, while he may be able to do **mechanical** work well enough, cannot do **brain work** and is bound to get in a rut **in the long run**. It takes a trained mind to read plans and blue prints; that's why so many workers live and die in the same kind of a position. You have seen the result on the first page of this advertisement. **The untrained man becomes THE MAN WHO STOOD STILL.**

¶ At the cost of thousands of dollars and years of experience of hundreds of the best known practical building experts, architects and construction engineers, we have collected and prepared the material for the greatest, most comprehensive, the most practical, thorough and understandable

CYCLOPEDIA of CONSTRUCTION, CARPENTRY, BUILDING, and ARCHITECTURE ever before even conceived.

Twelve Great Big Massive Volumes
and one extra large volume of 350 pages of actual plans, drawn by foremost architects.
Selected for their excellence, economy of design and popularity along the building classes. The volume of plans is portfolio size and is in itself worth the special price asked for the complete set.

Free on Five Days' Approval—No Risk to You—No Obligation—No Expense

We are making this great offer merely to advertise this set of books **at the start**. This is absolutely the newest, biggest and most comprehensive set of books ever written on the subject of Building Construction. Our entire organization has had a hand in preparing it, and we have picked outside men here and there from the best and most practical material available.

Four thousand pages—thousands of illustrations, diagrams, charts, plans and working drawings—handsomely and durably bound; deluxe in every particular.

**The Radford Architectural Co.
Medinah Building

**13
VOLUMES
4,000 PAGES**

¶ The difference between the **man at the desk** and the **man at the bench** is training—the kind of training that demands well paid positions of dignity and importance.

¶ We don't mean by this that the **desk job** is always better than the **bench job**. We don't mean that you should change your present work. We do mean, however, that you must combine more of the **desk man's kind of training** with your work if you want to continue a live factor in your trade.

¶ The desk man uses one kind of tool that too often the **bench man** neglects entirely. That tool—the best one in the whole kit—is books; practical books that tell how to do your work in the easiest, the best and latest ways; books that tell you all about each and every feature of your work to the smallest detail; books that keep you in touch with the biggest and smallest details of building construction.

¶ Government Statistics prove that the **average desk man** earn \$22,000.00 more in a lifetime than the **average bench man** simply because of this main fact—he trains the brain as well as the eye and hand.

Small List of Contents

To Realize their Tremendous Scope You Must See the Books

Carpentry
Stair Building
Steel Square
Correct Measurements
How to Test Steel Square
Key to Steel Square
Possibilities of Steel Square
Test Questions, Practical Problems, Reviews
Framing
Roof Construction
Roof Trusses and Mill Building Construction

Strength of Material
Shingling—All Kinds
Roofing Materials
Foundations, Retaining Walls, etc.
Piles and Caissons
Excavating
Masonry
Block Laying
Stone Cutting
Mortars, Limes, Cement, etc.
Sewers and Drains

House Drainage and Sanitation
Estimating and Superintendence
Laws of Building Contracts
Painting and Glazing

CHICAGO

American Carpenter and Builder

“The World’s Greatest Building Paper”

Endorsed by More Than **30,000** Satisfied Subscribers

BECAUSE it contains more pages of reading matter each month than any other building publication.

BECAUSE its contents are better and more practical.

BECAUSE it covers more subjects.

BECAUSE it has more illustrations and better illustrations.

BECAUSE it has the best writers and contributors in the country.

BECAUSE it has twice as many subscribers as any other publication in its field, each of whom is helping the others through the large and interesting correspondence department.

Its Important Departments

The AMERICAN CARPENTER AND BUILDER covers the building field thoroughly, its various departments being complete in descriptions and illustrations. Not only are the regular methods of construction shown, but also all other features that enter into building, such as heating, plumbing, ventilation, art glass, painting, water supply, decoration, tiling, etc.

Practical House Plans

Each issue of the AMERICAN CARPENTER AND BUILDER contains perspective views, floor plans and details of modern and moderate-cost residences, school buildings, farm buildings, bungalows, cement houses and cottages. These house plans are original and are absolutely correct.

Each number of the AMERICAN CARPENTER AND BUILDER is complete in itself.

Subscription Price, \$2.00 a year, in advance.
